

Mark O'Dowd

SENIOR FULL STACK ENGINEER
AWS Certified Solutions Architect
TypeScript & Python

● = hyperlink

Senior Full Stack Developer with 7+ years of experience architecting scalable, cloud native ecosystems using Next.js, Django and AWS. Expert in bridging product vision and high performance production with a proven track record of reducing infrastructure overhead through automated cost optimised deployments. Experienced in leveraging LLMs (Claude/OpenAI) to build intelligent features that meet rigorous enterprise security and quality standards

CERTIFICATIONS

AWS Certified Solutions Architect **SAA-C03** [Verify](#) AWS Certified Cloud Practitioner **CLF-C02** [Verify](#)

EXPERIENCE

Mark O'Dowd **FULL STACK DEVELOPER** *React, Next.js, TypeScript, AWS, Python, Django* Mar 2025 to Present

Fight Or Flight (fightorflight.studio) *Next.js, React, TypeScript, Tailwind, AWS, CMS (Contentful), GitHub actions, Cloudflare*

I developed a bespoke high performance Next.js platform for a Manchester creative studio leveraging Contentful CMS for streamlined content management. Built an automated CI/CD pipeline (GitHub Actions/AWS) with staging and production environments and optimized global delivery and DNS/Email security via Cloudflare.

Mushin Jujitsu Trainer (jujitsu.ie) *Next.js, React, TypeScript, Tailwind, AWS*

Using a modern tech stack I created a statically generated (SSG) interactive application for the World Ju-Jitsu Federation Ireland syllabus (80+ clubs) and hosted on AWS S3 allowing for an incredibly cost efficient application. I also optimised performance using WebP assets, delivered a mobile first experience and handled all DNS settings

Irish Trad (irishtrad.ie) *Next.js, React, TypeScript, Python, Tailwind, AWS, Django*

Architected and deployed a full stack platform providing interactive music tools and educational modules for Irish traditional music. Using the Web Audio API I was able to implement high precision, low latency tools including a chromatic tuner and metronome. AWS Amplify and Lightsail is used for automated deployments and scalability.

Dawson Andrews **SOFTWARE ENGINEER** *React, Next.js, TypeScript, AWS, Vue, Nuxt* May 2024 to Mar 2025

Dawson Andrews specialise in product design, strategy, and software development

- Rapidly adopted the Vue/Nuxt ecosystem to lead the end to end development of an enterprise grade web application ensuring a seamless transition from design to AWS backed production

Hurree **SOFTWARE ENGINEER** *React, Django, TypeScript, Python, Azure* Jan 2023 to Mar 2024

Hurree is a cross platform analytics dashboard that enables teams to unify data to gain one high level overview

- Engineered user friendly analytics features using React and Django, unifying unique data sources into high-performance, real-time dashboards for cross-platform business intelligence while championing code quality and system reliability by leading technical design discussions and conducting rigorous code reviews

Micro Focus **SOFTWARE ENGINEER** *React, TypeScript* Apr 2022 to Nov 2022

Micro Focus is one of the world's largest enterprise software providers delivering mission critical technology

- Spearheaded the integration of React into a mission critical legacy Java ecosystem creating a scalable i18n framework that enabled global localisation. Provided mentorship to junior engineer on my team

VML Technology **WEB ENGINEER** *React, Django, TypeScript, Python* Nov 2019 to Mar 2022

VML Technology pioneers new levels of video maximizing engagement through real time convergence of data

- Delivered core web platform features using React and Django, achieving 1:1 parity with mobile application for real time video engagement

EDUCATION

Queens University Belfast **BACHELOR OF SCIENCE IN MUSIC TECHNOLOGY & SONIC ARTS** 2012 to 2014
