

Mark O'Dowd

SENIOR FULL STACK ENGINEER
AWS Certified Solutions Architect

● = hyperlink

Senior Full Stack Developer with 7+ years of experience architecting scalable, cloud native ecosystems using Next.js, Django and AWS. Expert in bridging product vision and high performance production with a proven track record of reducing infrastructure overhead through automated cost optimised deployments. Experienced in leveraging LLMs (Claude/OpenAI) to build intelligent features that meet rigorous enterprise security and quality standards

TECH STACK

Languages: TypeScript, Python, Rust
Backend: Django, Node.js, Express
Infrastructure: AWS, GitHub Actions, CI/CD

Frontend: React, Next.js, Tailwind CSS
Databases: PostgreSQL, SQLite, DynamoDB, MongoDB
Tools: Linux, Bash, Docker, Neovim, Tmux

CERTIFICATIONS

AWS Certified Solutions Architect **SAA-C03** [Verify](#)

AWS Certified Cloud Practitioner **CLF-C02** [Verify](#)

EXPERIENCE

Emerald Software **SOFTWARE ENGINEER** *React, Next.js, TypeScript, AWS, Python, Django* Mar 2025 to Present

Fight Or Flight (fightorflight.studio) *Next.js, React, TypeScript, AWS, CMS (Contentful), GitHub Actions, Cloudflare*

I developed a bespoke high performance Next.js platform for a Manchester creative studio leveraging Contentful CMS for streamlined content management. Built an automated CI/CD pipeline (GitHub Actions/AWS) with staging and production environments and optimized global delivery and DNS/Email security via Cloudflare.

Mushin Jujitsu Trainer (jujitsu.ie) *Next.js, React, TypeScript, Tailwind, AWS*

Using a modern tech stack I created a statically generated (SSG) interactive application for the World Ju-Jitsu Federation Ireland syllabus (80+ clubs) and hosted on AWS S3 allowing for an incredibly cost efficient application. I also optimised performance using WebP assets, delivered a mobile first experience and handled all DNS settings

Irish Trad (irishtrad.ie) *Next.js, React, TypeScript, Python, Tailwind, AWS, Django*

Architected and deployed a full stack platform providing interactive music tools and educational modules for Irish traditional music. Using the Web Audio API I was able to implement high precision, low latency tools including a chromatic tuner and metronome. AWS Amplify and Lightsail is used for automated deployments and scalability

Repair Rehab (repair-rehab.com) *Next.js, React, TypeScript, Python, Tailwind, AWS, Django*

One of the leading device repair shops in N.Ireland wanted to improve their online presence and introduce the ability to process orders directly with customers digitally. As a result I generated a static landing page showcasing services that was optimised for SEO and included a form for customers to initialise the order process. A bespoke platform was setup where orders could be approved and processed

Dawson Andrews **SOFTWARE ENGINEER** *React, Next.js, TypeScript, AWS, Vue, Nuxt* May 2024 to Mar 2025

Dawson Andrews specialise in product design, strategy, and software development

- Rapidly adopted the Vue/Nuxt ecosystem to lead the end to end development of an enterprise grade web application ensuring a seamless transition from design to AWS backed production

Hurree **SOFTWARE ENGINEER** *React, Django, TypeScript, Python, Azure* Jan 2023 to Mar 2024

Hurree is a cross platform analytics dashboard that enables teams to unify data to gain one high level overview

- Engineered user friendly analytics features using React and Django, unifying unique data sources into high-performance, real-time dashboards for cross-platform business intelligence while championing code quality and system reliability by leading technical design discussions and conducting rigorous code reviews

Micro Focus **SOFTWARE ENGINEER** *React, TypeScript* Apr 2022 to Nov 2022

Micro Focus is one of the world's largest enterprise software providers delivering mission critical technology

- Spearheaded the integration of React into a mission critical legacy Java ecosystem creating a scalable i18n framework that enabled global localisation
- Provided mentorship and guidance to junior engineer on my team teaching how to do pull requests

VML Technology **WEB ENGINEER** *React, Django, TypeScript, Python* Nov 2019 to Mar 2022

VML Technology pioneers new levels of video maximizing engagement through real time convergence of data

- Delivered core web platform features using React and Django, achieving 1:1 parity with mobile application for real time video engagement

TECHNICAL LEADERSHIP & COMMUNITY

- **Star Mentor:** **Zero to Mastery** is an online technology academy providing video courses on a wide range of topics. They also have a Discord community of over 500,000 members. After 7+ years of dedication towards learning through the platform and giving back to the community through mentorship of juniors I am now 1 of 20 people in the community that has been recognised and granted the title of Star Mentor
- **Tech Talks:** Education is something that I am incredibly passionate about and as a result I have spoken at tech events within the data engineering community covering topics such as data manipulation with Apache Spark and how to train your own model with Spark ML
- **Meetups:** Engaging and networking within the various tech communities is important in order to stay on top of current trends and as such I have attended ~30 different events within the Dublin area: **Meetup Profile**
- **Technical Blog:** I'm an avid book reader and have recently started doing a blog reviewing each book. The blog is available at **Personal Blog**
- **Open Source Contributions:** As a Linux user I take the concept of open source to heart and try to give back to projects when I identify an issue or some way in which I can contribute. Some examples of contributions:
 - **React Flow:** While working on a project that used the React Flow library I noticed issues during development with the TypeScript typings in the library itself so provided them a detailed explanation and discussion to fix: <https://github.com/xyflow/web/issues/479>
 - **TanStack Table:** TanStack is a well regarded suite of libraries within the React ecosystem. When the Table product was early in development I was reading the docs and identified issues and provided a detailed Issue that included video which has since been completed: <https://github.com/TanStack/table/issues/5193>
 - **Leptos Book:** Leptos is one of the leading frameworks in the Rust web ecosystem. While reading the documentation there was grammatical issues. I provided a fix: <https://github.com/leptos-rs/book/pull/223>

EDUCATION

Queens University Belfast **BACHELOR OF SCIENCE IN MUSIC TECHNOLOGY** 2012 to 2014
